ZonVelden

Building a greener world

Our solutions help maximise landowners profit whilst also giving them the opportunities to be part of the energy supply and demand market.

Diversifying agricultural land is a key quality that ZonVelden pride themselves on. If you have livestock on your land we can increase the earning potential your land has by designing a solar farm that will work around your existing set up. Leasing land for grazing and leasing land for a solar farms. Geese, Goats, sheep and Hens are all welcome.

ZonVelden can also offer contracts for Landscape management works which mean that your sheep could be getting paid for cutting your grass too.

Sequunt. Ipit ipitatio et landae. Ut intium atqui ipsant quatia nam ad ea audame ne od qui omnihicab illam veles re perspiciis mo omnimus moditat emperia cus eum arumquamus solupta con repturia nulpa sam et es earibus.
